SIMONE ATTANASIO

EXPERTISE

Business development in Biotech
Value Proposition and Business Planning
Commercialization and go-to-market strategies
Strategic Science Communication
Content Creation & Copywriting
Social Media Management
Brand messaging
Digital Marketing Tools

TECHNICAL STRENGTHS

Python, BioPython, R, SQL, mySQL, GitHub, PyMol, Chimera

TEACHING

Praktikum for Bachelor and Master Students at Osnabrück University

Supervised theses

Vianny Halland (2021)
Darlene Lütkeniehoff (2022)
Jana van Putten (2023)
Clara von Höveling (2023)

Business Developer in Deep Tech

EXPERIENCE

Business develeper
2025/9 - present

Vaimee srl (Italy)

- Managed teams and optimized resource allocation to improve execution efficiency.
- Coordinated lead tracking and sales workflows in Odoo to strengthen pipeline performance.
- Optimized B2B and B2C listings using priority-based ranking
- Developed and implemented pricing strategy aligned with market positioning and growth targets.
- Designed channel acquisition strategies to expand reach and increase customer inflow.
- Design of the strategic roadmap
- SpinOff creation upon european funding acquisition

Senior business developer
2025/1 - present

Horizon Booster Service META

- Supporting the strategic exploitation of EU-funded research outcomes as an external expert for Meta Booster Service.
- Advising on maximizing impact, stakeholder engagement, and sustainability beyond funding.
- Identification of Value Proposition, Product-Market fit and Business Planning
- Projects followed so far:
  - CORENET - Complex chemical reaction networks for breakthrough scalable reservoir computing
  - INN - InsectNeuroNano
  - BGE - Biodiversity Genomics Europe
  - NAP - Twin on a chip brains for monitoring individual sleep habits
  - TREM2MEDS - Clinical implementation of TREM2 Microglia Engeneering for treating DementiaS
  - SMILE – Supporting Mental Health in Young People

Business developer
2025/9 - 2026/02

AI|ffinity sro (Czech Republic)

- Customer outreach and relationship management, strengthening engagement and supporting business growth.
- Transforming customer feedback into actionable insights to inform product/service improvements and team priorities.
- Identified high-value “hotspot” features and user needs to refine positioning and roadmap focus.
- facilitating collaboration opportunities and long-term alignment.
- Supported investor relations by preparing updates, coordinating interactions, and shaping opportunity narratives.
- Developed and delivered product demos tailored to customer and partner use cases.
- Contributing to brand identity initiatives to ensure consistent and differentiated market presence.

LANGUAGES

Italian	native
English	fluent
Spanish	excellent command
French	excellent command
Portuguese	good command
German	good command

EDUCATION

University of Trieste
International Master in Neuroscience
Completed in 2019
110 / 110 cum laude

University of Bari
Bachelor degree in Biology
Completed in 2017
98/110

VOLUNTEERING EXPERIENCE

Brain Innovation Days 2023
TedX Taranto 2019
Quantitative Approaches to behavior and neural systems 2018
Web Summit 2018

INTERESTS

Non-Fiction Books
Photography and videomaking
Languages
Volleyball

Post Doc in Bioinformatics and AI 2024/1 - 2025/3

Université libre de Bruxelles

- Machine Learning for solubility prediction upon point mutation
- Protein prediction with AI in 3D space (ColabFold)
- Data analysis in cancer
- Data analysis in genomics

Communication Scientist ML4NGP 2023/8 - present

COST action: Machine Learning for Non-Globular Proteins

- Events organization and dissemination
- Video production and editing
- Handling Social Profiles (LinkedIN and X)
- Writing newsletter and blog articles

Further Education - Bioinformatics and biostatistic 2023/8 - 2023/12

CQ Beratung + Bildung

- Introduction to Python and programming
- Bioinformatics and databases (including NCBI, Biopython, SQL)
- Applied bioinformatics (including sequence analysis, structural bioinformatics, NGS analysis using Galaxy) and applied statistics (statistical analysis using R/R studio, descriptive and multivariate statistics, workflows with R/Bioconductor, Markov chain implementation)

PhD in Molecular Neurobiology 2020/3 - 2023/2

University of Osnabrück

- Dissecting the effect of external Tau aggregates on intracellular Tau diffusion
- FDAP analysis of fluorescent labelled proteins in the axon-like process of neuronal differentiated PC12 cells. (Matlab, R, BASH)
- Study of effects of Maytansinoids on Tubulin diffusion

University of Milan 2021/9 - 2023/2

- Evaluation of interaction of Tubulin and Synuclein in vitro
- Purification of pure proteins like Tubulin from bovine brain, Synuclein from E.Coli.
- Analysis interaction with Microscale Thermophoresis
- Evaluation of fibril morphology with Transmission Electron Microscopy

Advanced Course in Bioinformatics 2022/2 - 2022/11

University of Rome (Sapienza)

- Thesis on Structure Analysis of human Tau Protein, interactions and disorder prediction
  - Databases used: Uniprot, PDB-e, RCSB-PDB, ELM
  - Software used: Clustal Omega, Chimera, PsiPred

ADDITIONAL TRAINING

Poster presented

EuroTau meeting (Lille) 2023/4

- Poster title: Extracellular Tau impairs the interaction of Tau with microtubules in model neurons

InternationalSymposium on Pathomechanism of Amyloid Diseases (Catania) 2022/8

- Poster title: Dissecting the effect of extracellular Tau on Tau in cells: a new cellular model for understanding Tauopathies

Synuclein meeting (Leuven) 2022/4

- Poster title: α-Synuclein mutations linked to Parkinson's disease impact on microtubule interaction and dynamics

Conferences Attended

PhasAGE - Training School - "Protein aggregation, intrinsic disorder and phase separation in the era of machine learning" 2023/04

10th Westerberger Herbsttagung on the Perspectives of Molecular Biology 2022/10

- Membranes and the Cytoskeleton in Health and Neurodegenerative Disease

Motor neuron diseases: understanding the pathogenetic mechanisms to develop therapies 2022/11

Microtubules: from atoms to complex systems (EMBO) 2020/06

Additional Courses

Foundation of Project Management 2023/5 - 2023/6

Pathogenesis of Epilepsy 2023/2 - 2023/5

Computational Chemistry and Bioinformatic 2022/2

Human induced pluripotent stem Cells (IPSC) and organoids in neurobiology and in neurodegenerative diseases 2021/4

Storytelling and Stagecraft for Researchers 2020/11

Writing About Science 2020/10
